1. ☒ The following document has not yet been furnished:

☒ copy of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(a)).

☐ translation of the earlier application whose priority has been claimed (Rule 43bis.1 and 66.7(b)).

Consequently it has not been possible to consider the validity of the priority claim. This opinion has nevertheless been established on the assumption that the relevant date in the claimed priority date.

2. ☐ This opinion has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rules 43bis.1 and 64.1). Thus for the purposes of this opinion, the international filing date indicated above is considered to be the relevant date.

2. Citations and explanations:

The documents cited are numbered in the same order as they appear in the international search report.

The present invention relates to a synergistic fungicide composition containing a triazole-pyrimidine derivative (I) and propiconazole (II).

D1 describes similar compositions, compound (I) being substituted, however, by an analog. D2 describes compound (I) in combination with analogs thereof and lists (II) as a possible compound partner, while the claimed combination *per se* is not explicitly disclosed and no clear teaching exists in connection therewith. The present application therefore satisfies the criterion in PCT Article 33(2) because the subject matter of claims 1-10 is novel in relation to the prior art as defined in the Regulations (PCT Rule 64.1 to 64.3).

The present application contains comparative tests which involve precisely those compositions previously published in D1. These tests show unequivocally that the claimed choice makes possible not only a synergistic effect, but also an improved synergistic effect compared to the most

similar compositions to be taken from D1. This improvement was not to be expected. The present application therefore satisfies the criterion in PCT Article 33(3) because the subject matter of claims 1-10 involves an inventive step (PCT Rule 65.1 to 65.2).

The present application satisfies the criterion in PCT Article 33(4) because the subject matter of claims 1-10 is regarded as industrially applicable.
